EQB MONITOR

NOTICES

The Minnesota Environmental Quality Board (EQB) meeting scheduled for **Thursday, December 21, 2006, has been cancelled.** The next Board meeting is scheduled for Thursday, January 18, 2007. The next Tech Rep meeting is scheduled for Tuesday, January 9, 2007.

If you have questions, feel free to contact Leslie Carney at (651) 201-2464.

EQB Requesting Comments on Additional Phase 2 Rule Amendments

On August 14, 2006, the EQB published a Request for Comments for the Phase 2 Environmental Review program rulemaking. After reviewing comments received, and because of certain other developments following the publication of the Phase 2 Request for Comments, the EQB has decided to consider several additional amendments to the Environmental Review program rules that were not referenced in the Request for Comments.

The additional amendments that are being considered are:

- At parts 4410.1200, 4410.2300 & 4410.3610, subpart 4, the EQB will consider adding guidance on how to address analysis of cumulative effects in Environmental Assessment Worksheets (EAWs), Environmental Impact Statements (EISs), and Alternative Urban Areawide Review (AUAR) documents. The EQB is interested in advice and comment about the nature and scope of such guidance.
- At part 4410.4600, subpart 1, the EQB wishes to correct incorrect references. The first sentence should reference subparts 2 and 26, not 27, and the second sentence should reference subparts 3 to 25 and also subpart 27. These errors occurred during the adoption of exemption thresholds for recreational trail projects in 2005.

The *EQB Monitor* is a biweekly publication of the Environmental Quality Board that lists descriptions and deadlines for Environmental Assessment Worksheets, Environmental Impact Statements, and other notices. The *EQB Monitor* is posted on the Environmental Quality board home page at <http://www.eqb.state.mn.us/>.

Upon request, the *EQB Monitor* will be made available in an alternative format, such as Braille, large print, or audio tape. For TTY, contact Minnesota Relay Service at 800-627-3529 and ask for Department of Administration. For information on the *EQB Monitor*, contact:

Minnesota Environmental Quality Board
658 Cedar St., 300 Centennial Office Building
St. Paul, MN 55155-1388
Phone: 651-201-2480
Fax: 651-296-3698
<http://www.eqb.state.mn.us>

- At part 4410.3100, the EQB wishes to clarify that it is permissible for a governmental unit to prepare and give public notice of a draft permit or other approval document prior to the completion of the Environmental Review process, provided that no final decisions to grant or issue permits or approvals are made until after the process has been completed.

A Supplemental Request for Comments giving official notice of these additional potential amendments was published in the *State Register* on December 11, 2006.

Public Comment. Interested persons or groups may submit comments or information on the additional possible rule amendments in writing or orally until 4:30 p.m. on Wednesday, January 31, 2007.

Contact Person. Written or oral comments, questions, or requests for more information on these possible amendments to rules should be directed to: Gregg Downing, Environmental Quality Board, 300 Centennial Building, 658 Cedar Street, St. Paul, MN 55155; telephone: 651/201-2476, Fax: 651/296-3698, E-mail: gregg.downing@state.mn.us. TTY users may call the Board at 800/627-3529.

ENVIRONMENTAL ASSESSMENT WORKSHEETS

EAW Comment Deadline: January 17, 2007

Project Title: Ramsey Crossings

Description: The proposed Ramsey Crossings commercial development includes approximately 69 acres north of US Hwy. 10 and west of Armstrong Boulevard on the west side of the city of Ramsey. This development will have a total building area of 651,000 square feet, including discount retail store, department store, home improvement store, electronics store, drug store, sporting goods, retail anchors, retail shops, and restaurants. This project will involve the extension of municipal utilities including sanitary sewer, water, public roads, storm sewer, and construction of storm water ponds.

ageisler@ci.ramsey.mn.us

Project Title: One Riverfront View

Description: The One Riverfront View project consists of demolishing an existing health club and office building and redeveloping the 10-acre site with a 91-unit, four-story condominium building, below grade

parking, a trail connection to the I-35E bridge trail, and 7.8 acres of green space that will be restored and/or landscaped. The project will bring municipal water to the site and introduce a storm water management system.

EIS NEED DECISIONS

The responsible governmental unit has determined the following projects do not require preparation of an EIS. The dates given are, respectively, the date of the determination and the date the EAW notice was published in the *EQB Monitor*.

- Minnesota Pollution Control Agency Citizens' Board, VeraSun Welcome, LLC, Ethanol Facility, November 28, 2006 (September 25, 2006)
- Minnesota Pollution Control Agency Citizens' Board, Fergus Falls Transfer Station, November 28, 2006 (August 14, 2006)

PETITIONS FILED

The following petitions have been filed with the EQB requesting preparation of an EAW. The EQB has assigned the indicated unit of government to review the petition and decide on the need for an EAW.

- Minnesota Department of Agriculture, registration of atrazine
- Minnesota Department of Agriculture, registration of acetochlor
- Minnesota Department of Agriculture, registration of chlorpyrifos
- Cass County, EAW for Girl Lake residential project
- Cannon Falls, Progressive Rail Inc. project on Minnesota Malting property

AUAR ADOPTED

Project Title: CSAH 1 and I-35 Final AUAR – Rice County, Minnesota

Description: Rice County Board of Commissioners approved the Final Alternative Urban Areawide Review (AUAR) for the CSAH 1 and I-35 Study Area at the Board of Commissioners meeting November 14, 2006.

AUAR AVAILABLE

Project Title: The West End AUAR

Description: The proposed redevelopment is considered for a 48.6-acre parcel of land at the southwest corner of I-394 and Trunk Highway 100 in St. Louis Park, MN, with portions in Golden Valley, MN. Four build scenarios are under consideration, proposing a mix of office, commercial and residential uses. A fifth scenario reflecting the current comprehensive plan is also under consideration.

The comment period for the AUAR will remain open until January 17, 2007. Comments on the AUAR should be submitted directly to Meg McMonigal, Planning and Zoning Supervisor, City of St. Louis Park, 5005 Minnetonka Boulevard, St. Louis Park, MN 55416. A neighborhood meeting will be held to discuss the project on Tuesday, January 9, 2007 at St. Louis Park City Council Chambers (5005 Minnetonka Boulevard), beginning at 7:00 PM.

The document is also available for review at the St. Louis Park Library (3240 Library Lane), the Environmental Conservation Library and the Legislative Reference Library. The AUAR can also be viewed on the City of St. Louis Park website at www.stlouispark.org.

FINAL EIS'S AVAILABLE

The Department of Natural Resources (DNR) has prepared a Final Environmental Impact Statement (EIS) for the proposal by Mittal Steel USA - Minorca Mine, Inc. (formerly Ispat Inland Mining Company) to open the East Reserve; a new open-pit mine area located between the towns of Biwabik and McKinley.

This Final EIS responds to timely substantive comments on the Draft EIS, and corrects errors in the Draft EIS. Together, the Final EIS and the Draft EIS comprise the complete EIS, which documents the analysis of potential impacts associated with a new open-pit mine area located between the towns of Biwabik and McKinley that would consist of two separate mine pits; an overburden, waste rock and lean taconite stockpile area north of the mine pits; dewatering routes; and a new haul road extension from the existing Laurentian Mine haul road.

The DNR will accept comments on the adequacy of the Final EIS during the comment period that concludes at 4:30 p.m. on Wednesday, January 3, 2007.

Minnesota Rules part 4410.2800, subpart 4 requires the Final EIS to be adequate if:

- A. addresses the potentially significant issues and alternatives raised in scoping so that all significant issues for which information can be reasonably obtained have been analyzed in conformance with part 4410.2300, items G and H;
- B. provides responses to the substantive comments received during the draft EIS review concerning issues raised in scoping; and
- C. was prepared in compliance with the procedures of the act and parts 4410.0200 to 4410.6500.

Written comments should be submitted to Scott Ek, Principal Planner, Environmental Policy & Review, Division of Ecological Services, Minnesota Department of Natural Resources, 500 Lafayette Road, Box 25, St. Paul, MN 55155. Comments may also be emailed to environmental.review@dnr.state.mn.us with “East Reserve” in the subject line. Emails should include a name and legal mailing address.

Following the close of the Final EIS comment period, the DNR will determine the adequacy of the EIS and will prepare a record of its decision. If the DNR determines the EIS is inadequate, it shall have 60 days in which to prepare an adequate EIS. A notice of its adequacy decision will be published in the Environmental Quality Board (EQB) *Monitor*.

Public review copies of the documents are available at the DNR Library, 500 Lafayette Road, St. Paul, MN; the DNR Regional Office, 1201 East Highway 2, Grand Rapids, MN; the Duluth Public Library, 144 West Second Street, Duluth, MN; the Minneapolis Public Library, Government Documents (2nd Floor), 300 Nicollet Mall, Minneapolis, MN; and Gilbert Public Library, 17 North Broadway, Gilbert, MN.

The documents are also posted on DNR’s Website at <http://www.dnr.state.mn.us/input/environmentalreview/eastreserve/index.html>.

Questions about this EIS may be directed to Scott Ek, Principal Planner at 651-259-5156.

Project Title: 3 Bays on Vermilion Final Environmental Impact Statement

Description: Notice is hereby given that a Final Environmental Impact Statement (EIS) has been prepared by St. Louis County on a proposal by the U.S. Steel Corporation (USS) and is available for public review. USS proposes subdivision of approximately 1,400 acres of property on the south shore of Lake Vermilion in the town of Breitung, approximately two miles east of the city of Tower. The preparation of the EIS is mandatory pursuant to Minnesota Rule 4410.4400, subp. 14 (A), as there will be more than 100 residential units in an unsewered area. St. Louis County is the governmental unit responsible for this EIS.

Pursuant to Minn. R. 4410.2800, subp. 2, publication of this notice begins a minimum ten-day public review period during which any person may submit comments on the adequacy of the Final EIS to St. Louis County. This comment period will expire at 4:30 pm on January 5, 2007. In addition, a press release is being made available to media in the area of the Project pursuant to Minn. R. 4410.2700, subps. 4-6.

A copy of the Final EIS will be posted on the St. Louis County Web site, at the following address: <http://www.co.st-louis.mn.us/slcportal/> or can be provided on CD upon request. Requests for copies of the Final

EIS may be obtained by contacting Scott Smith, Physical Planning Manager, St. Louis County Planning Department at (218) 725-5005.

The Final EIS, comments received during the additional ten-day public review period, and responses to those comments will be presented to the St. Louis County Board for a determination of adequacy on January 23, 2007 in the vicinity of Virginia, Minnesota. Any person may appear at this meeting and address the Board on the subject of the adequacy of the Final EIS. Notification of the exact time and location of this public meeting will be provided after the County Board establishes their 2007 meeting schedule. Notice of the Board's determination and action on the Final EIS will be distributed after the meeting pursuant to Minn. R. 4410.2800, subp. 6.

EIS PREPARATION NOTICE

Project Title: New Ulm Municipal Airport

Project Description: The proposed project would extend Runway 15/33 and its parallel taxiway to the southeast increasing its physical length from 4,401 feet to 5,625 feet, a total of 1,224 feet. An approach lighting system extending south from Runway 15/33 along its centerline would also be installed.

The existing turf Crosswind Runway 4/22 would be decommissioned, relocated west of the existing airport boundary, reoriented in an east-west direction, lengthened from 2,825 feet and reopened for use as a 3,000' turf runway with orientation at 9/27. This runway at an undetermined point in the future would be lengthened to 4,000 feet, paved and would include a parallel taxiway.

Project Preparation: Preparation of a State EIS and joint federal Environmental Assessment is set to begin for the above described proposed project at New Ulm Municipal Airport. The Final Scoping Decision Document for the proposed project was approved by the New Ulm City Council November 21, 2006 following a recommendation for approval from the Airport Advisory Commission. Copies of the Final Scoping Decision Document and Scoping Environmental Assessment Worksheet are available upon request from:

New Ulm, MN 56073

EIS ADEQUACY DECISION

Project Title: Olmstead Waste-to-Energy Facility: Municipal Waste Combustor Unit 3 Project

Description: On November 28, 2006, the Minnesota Pollution Control Agency (MPCA) Citizens' Board voted to approve the Findings of Fact, Conclusions of Law, and Order for the adequacy decision on the Environmental Impact Statement (EIS) for the proposed Olmsted Waste-to-Energy Facility: Municipal Waste Combustor Unit 3 project, city of Rochester, Olmsted County.

The MPCA has determined that the Olmsted Waste-to-Energy Facility: Municipal Waste Combustor Unit 3 project EIS is adequate.

NOTICES

Minnesota Forest Resources Council Public Meeting Notices

- The Minnesota Forest Resources Biomass Guideline Committee will meet on Thursday, December 21, 2006, from 9:30 a.m. to 3:30 p.m. The meeting will be held at the University of Minnesota's Cloquet Forestry Center located at 175 University Road in Cloquet. To get additional details about the meeting, contact Dick Rossman at (218) 755-4062.
- The Minnesota Forest Resources (MFRC) will meet on Wednesday, January 24, 2006, from 9:30 a.m. to 3:30 p.m. at the Shoreview Community Center, located in Shoreview, MN. **NOTICE OF APPLICATION FOR A SITE PERMIT
&
PUBLIC INFORMATION MEETING**

**January 17, 2006, 7:00 PM
Grumpy's Restaurant and Lounge
Grand Meadow, Minnesota
Minnesota Department of Commerce**

DRAFT SITE PERMIT AVAILABLE

**For the proposed
High Prairie Wind Farm II**

MPUC Docket No. PT65556/WS-06-1520

PLEASE TAKE NOTICE that High Prairie Wind Farm II, LLC (High Prairie II), has applied to the Minnesota Public Utilities Commission for a site permit for a large wind energy conversion system of approximately 100.65 megawatts. The application was submitted on November 22, 2006 and was accepted by the Public Utilities Commission on December 7, 2006. A public information meeting will be held on the application by High Prairie Wind Farm II, LLC, to build up to a 100.65 megawatt (MW) large wind energy conversion system (LWECS). The public meeting will take place at 7:00 p.m., on Wednesday, January 17, 2006, at Grumpy's Restaurant and Lounge, 204 4th Avenue NE, Grand Meadow, MN 55936

Staff of the Department of Commerce (DOC) will conduct the meeting and describe the state's wind energy site permitting process. Representatives of the applicant (High Prairie Wind Farm II, LLC) will be at the meeting to describe the proposed project and answer questions.

Project Description

The High Prairie Wind Farm II (Project) is a Large Wind Energy Conversion System of approximately 100.65 MW and will consist of up to 61 wind turbines. The turbines will be either the Vestas V82, 1.65-MW MK II or similar wind turbine mounted on freestanding tubular steel towers. The towers will be 80 meters (262 feet) in height. The rotor diameter will be 82 meters (269 feet), resulting in a maximum overall height of 121 meters (397 feet) when one blade is in the vertical position. The electrical collector system will consist of underground 34.5 kV collection lines and facilities providing step-up transformation. Power from the project will be delivered and sold to Great River Energy at the Adams Substation. A new project substation, located in Section 10 of Clayton Township and a new 161 kV transmission line, approximately three miles long, will be built to carry the power from the Project to the Adams Substation. The 161 kV transmission line project is being reviewed and permitted by Mower County and does not require a route permit from the PUC. The Project will include an underground 34.5 kV electrical collection system to deliver power from each turbine to the Project Substation as described above. Other Project associated facilities will include pad mounted step-up transformers and access roads.

Proposed Site Location

As shown on the accompanying map, the proposed project site is located in Mower County; portions of the project will be located in parts of Bennington, Clayton, Marshall and Grand Meadow Townships. The total project site area including the wind plant and land easements is approximately 13,000 acres. The total development consists of approximately 81 acres.

MPUC Site Permit Review Process

High Prairie Wind Farm II, LLC (High Prairie) filed a site permit application, with the Public Utilities Commission for the 100.65 MW LWECS project on November 21, 2006, which was accepted by the Public Utilities Commission on December 7, 2006. The DOC is now reviewing the High Prairie Wind Farm II site permit application under the Wind Siting Act (Minnesota Statutes, sections 116C.691 - 116C.697) and the Wind Permitting Rules (Minnesota Rules, Chapter 4401). Upon completion of the review requirements, the DOC will present the record of this matter to the PUC for a final decision.

Public Comments

The site permit application, Draft Site Permit and the agency rules guiding the review process are available on the MPUC website at:

<http://energyfacilities.puc.state.mn.us/Docket.html?Id=18884>

Interested persons may comment on the site permit application and Draft Site Permit at the public meeting or may submit written or fax (651-297-1959) comments by 4:30 p.m. on **January 31, 2007**. **Please include the following docket number (PT6556/WS-06-1520)**. Written or fax comments should be directed to: Sharon Ferguson, Department of Commerce, 85 7th Place East, Suite 500, St. Paul, MN 55101-2198.

DOC Project Contacts

Questions about the project and the PUC permitting process may be directed to: Jeffrey Haase, Department of Commerce, 85 7th Place East, Suite 500, St. Paul, MN 55101-2198; Tel: 651-297-5648; Fax 651-297-7891; e-mail jeffrey.haase@state.mn.us. Larry Hartman, with the DOC staff, has been appointed as the public advisor to assist and advise citizens on how to participate in the site permit process. He can be contacted at: Tel: 651-296-5089 or e-mail: larry.hartman@state.mn.us and the mailing address above.

Questions about the High Prairie Wind Farm II, LLC Site Permit Application can also be directed to the applicant by contacting Robert L. Crowell at 713-571-6640 or bob.crowell@horizon.com

Hearing Request

Any person may request a contested case hearing in this matter. All contested case hearing requests must be filed with Sharon Ferguson (address above) in writing by 4:30 p.m. on **Wednesday, January 31, 2007**. The person requesting the public hearing must list the issues to be addressed in the hearing and the reasons why a hearing is required to resolve those issues. The PUC shall order a contested case hearing if it finds that a material issue of fact has been raised and that the holding of the hearing will aid the PUC in making a final decision on the site permit application.

Project Background Information

Copies of the High Prairie Wind Farm site permit application have been distributed to affected landowners, and township, county and state officials. Copies of the application and Draft Site Permit are available for review at the Auditor's Offices in Mower County, and the city offices in Grand Meadow, Elkton, Taopi, Adams, and LeRoy. All project documents are available on the PUC Web site at:

<http://energyfacilities.puc.state.mn.us/Docket.html?Id=18884>

NOTICE OF ENVIRONMENTAL ASSESSMENT AVAILABILITY

Issued: December 15, 2006

**In the Matter of the 115 kV Appleton to Canby
High Voltage Transmission Line Project proposed by Ottertail Power Company
MPUC Docket Numbers: E017/CN-06-677 and E017/TL-06-1265**

PLEASE TAKE NOTICE that the Environmental Assessment (EA) for the Ottertail Power Company (OTP) Appleton to Canby Transmission project has been completed and is available to the public. The EA addresses potential human and environmental impacts of the proposed high voltage transmission line (HVTL) project and alternatives. Copies of the EA and other relevant documents are accessible at:

<http://energyfacilities.puc.state.mn.us/Docket.html?Id=18663>

Paper copies may be requested from the Minnesota Department of Commerce (DOC) staff listed at the end of this notice.

Project Description

The proposed Appleton to Canby Transmission project is a rebuild of an existing 42 mile HVTL from 41.6 kilovolts (kV) to 115 kV. The proposed project is located in Minnesota in Swift, Lac Qui Parle, and Yellow Medicine counties, between Appleton and Canby in the following townships: Cerro Gordo; Hamlin; Hantho; Providence; Riverside; Appleton; Hammer and Oshkosh.

The proposed route is the same route that the existing 41.6 kV line presently follows. The route originates at the Appleton substation in the northwest corner of the city of Appleton, MN. The line follows section lines due south for three miles from the Appleton substation paralleling MN State Highway 119. The line then cuts diagonally across Section 33 of Appleton Township in Swift County and crosses the Minnesota River, where it again travels due south along MN State Highway 119 about twenty miles to the Dawson substation.

From the Dawson substation the line turns due west for about six miles along U.S. Highway 212, then turns due south at the intersection of Highway 212 and U.S. Highway 75. The line parallels Highway 75 for about twelve miles, where it cuts diagonally through Section 19 of Oshkosh Township in Yellow Medicine County and runs to the Canby substation.

The proposal includes modifications to the Canby substation, Dawson substation, Louisburg Junction substation and the Appleton substation.

PUC Review Process

OTP has submitted an Application for a Certificate of Need and Route Permit to the PUC. The DOC has been assigned the responsibility to conduct public meetings and environmental review of the proposed transmission lines under the alternative review process found in Minnesota Rules Chapter 4400.

The DOC has prepared an EA analyzing the environmental impacts and alternatives to the proposed transmission project and proposed route. The EA considers issues related both to the need for the project, and issues related to routing.

A public hearing presided over by an Administrative Law Judge from the Office of Administrative Hearings will be scheduled in early 2007 at a location near Dawson, MN. Notice of the hearing will be published in local newspapers and mailed to persons receiving this notice by U.S. Mail and those who register their names on the project mailing list with the Department. Persons interested in adding their names to this mailing list should contact the DOC or register on the webpage cited below.

Project Contacts and Information

For more information about the process, the project or to place your name on the project mailing list, contact the DOC project manager, Jeffrey Haase (Tel: 651-297-5648 or jeffrey.haase@state.mn.us) or Deborah Pile (Tel: 651-297-2375 or deborah.pile@state.mn.us) Department of Commerce, 85 7th Place East, Suite 500, Saint Paul, Minnesota 55101-2198. Other contact information: Toll-Free Tel: 1-800-657-3794, Fax: 651-297-7891 or TTY: Minnesota Relay Service, 800-627-3529, and ask for the DOC.

The Environmental Assessment and other relevant documents are accessible at:

<http://energyfacilities.puc.state.mn.us/Docket.html?Id=18663>
