

NAME _____

Discussion Questions:

As an individual, please respond in writing to the following questions. After everyone has had a chance to respond, we will organize into small groups. In the small groups, individuals will share their ideas with each other. The small groups will write down two key ideas for each question and share them with the large group.

1) *What do you like about the preliminary rule language, definitions, possible approaches to thresholds and changes?*

2) *How would you improve the preliminary language? Are there parts of the preliminary language that need clarification?*

3) *From your perspective, are there any “fatal flaws” in the preliminary language? (A “fatal flaw” is an idea or approach that renders the whole product unacceptable.)*

4) *What are your thoughts, perspectives, questions and/or advice on the preliminary thresholds described in the preliminary language? What do you like about the thresholds? What concerns you about them? How would you improve them?*

5) *Please provide other thoughts on the preliminary language or scope of the Mandatory Category Rulemaking?*
